NC Total Retirement Plans Solution for Retirement Readiness

• Many financial experts suggest that retirees will need 80% of pre-retirement income

• You participate in one of the most secure and responsibly managed defined benefit plans in the nation - LGERS

• You also have the potential to save additional funds by participating in the defined contribution plans, which benefit from very low fees and strong oversight of the Supplemental Retirement Board of Trustees: NC 401(k), NC 457, and NC 403(b)

• These plans, along with your Social Security, are part of the Total Retirement Plans solution that may help you achieve a secure financial future and a more comfortable retirement
Are you retirement ready?

According to industry experts, being “retirement ready” means that you’re on track to replace at least 80 percent of your pre-retirement income through retirement.

- Approximately 44% are ready: Pension and Social Security
- Approximately 71% are ready: Pension, Social Security, and SRP(s)

GoalMaker®

GoalMaker is an optional tool and available at no additional cost. GoalMaker’s model allocations are based on generally accepted financial theories that take into account the historic returns of different asset classes. Past performance of any investment does not guarantee future results. Prudential Financial encourages participants to consider their other assets, income and investments when enrolling in the GoalMaker program. We also recommend participants periodically reassess their GoalMaker investments to make sure their model portfolio continues to correspond to their investment objectives, risk tolerance and retirement time horizon.

What kind of investor are you?

- **Aggressive investors** generally seek to maximize investment returns and can tolerate substantial market fluctuations.

- **Moderate investors** generally are willing to sacrifice safety of principal for potentially greater returns, and can tolerate modest market fluctuations.

- **Conservative investors** generally are concerned about short-term ups and downs in the market, and want to minimize risk and maintain principal.
