You Get

Risk vs. Reward

This is a simplified illustration of the relationship between investment risk and potential rate of return. There is no assurance that higher risk investments will provide greater returns over time. Past performance is not indicative of future performance.

GoalMaker[®]

What kind of investor are you?

- **Aggressive investors** generally seek to maximize investment returns and can tolerate substantial market fluctuations.
- **Moderate investors** generally are willing to sacrifice safety of principal for potentially greater returns, and can tolerate modest market fluctuations.
- **Conservative investors** generally are concerned about short-term ups and downs in the market, and want to minimize risk and maintain principal.

GoalMaker is an optional tool and available at no additional cost. GoalMaker's model allocations are based on generally accepted financial theories that take into account the historic returns of different asset classes. Past performance of any investment does not guarantee future results. Prudential Financial encourages participants to consider their other assets, income and investments when enrolling in the GoalMaker program. We also recommend participants periodically reassess their GoalMaker investments to make sure their model portfolio continues to correspond to their investment objectives, risk tolerance and retirement time horizon.
