**REPORT ON THE ACTUARIAL VALUATION OF
THE NORTH CAROLINA FIREMEN'S AND
RESCUE SQUAD WORKERS' PENSION FUND
PREPARED AS OF JUNE 30, 2012**

April 1, 2013

Board of Trustees
North Carolina Firemen's and Rescue
Squad Workers' Pension Fund
Raleigh, North Carolina

Members of the Board:

The North Carolina Firemen's and Rescue Squad Workers' Pension Fund became effective as of January 1, 1982. It is a continuation of the North Carolina Firemen's Pension Fund, which became effective July 1, 1959. Contributions to provide the benefits under the Fund are made jointly by the members and by the State. The members' rate of contribution is fixed at \$10 per month, while the State's rate of contribution is to be determined annually on the basis of actuarial valuations, so that the total contributions of the members and the State, together with the interest earned on the investments of the Fund, will be sufficient to provide all benefits payable from the Fund.

An actuarial valuation of the Fund, prepared as of June 30, 2012, has now been completed and the results are presented in this report, together with our recommendations regarding contributions payable by the State.

The annual required contribution for the fiscal year ending June 30, 2014 is \$14,620,362.

The valuation has been prepared in accordance with the parameters of Statement Nos. 25 and 27 of the Governmental Accounting Standards Board (GASB). The annual required contribution (ARC) under GASB for the fiscal year ending 2014 is \$14,620,362 based on a twelve-year liquidation period of the unfunded accrued liability. The Fund has a Net Pension Obligation (NPO) of \$2,365,284.

The plan sponsor selected the assumptions used for the results in this report. I believe that these assumptions are reasonable and comply with the requirements of GASB Nos. 25 and 27. I prepared this report in accordance with the requirements of these standards.

The census data provided for use in these calculations included inconsistencies between Hire Date, Credited Service and Accumulated Member Contributions. We understand that the census data and proper administration of the receipt of member contributions, roster service, credited service and the indication of full-time firefighters vs. volunteer firefighters is currently under review. The potential impact of such a review has not been reflected in our valuation. However, the results of the review could lead to a significant difference in future valuation results.

The undersigned meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained in this report. This report has been prepared in accordance with all applicable Actuarial Standards of Practice, and we are available to answer questions about it.

The Table of Contents, which immediately follows, outlines the material contained in the report.

Respectfully submitted,

Michael A. Ribble, FSA, EA, MAAA

The valuation balance sheet gives the following information with respect to the funds of the system as of June 30, 2012.

Annuity Savings Fund

The Annuity Savings Fund is the fund to which are credited contributions made by members. When a member retires, the amount of his accumulated contributions is transferred from the Annuity Savings Fund to the Pension Accumulation Fund.

The assets credited to the Annuity Savings Fund on account of Firemen on June 30, 2012, which represent the accumulated contributions of members to that date, amounted to \$35,550,363. The balance sheet also shows that the future contributions by members have a present value of \$27,682,530. The present value of both past and future contributions of members is therefore equal to \$63,232,893. The liabilities of this fund are also shown to be equal to \$63,232,893.

The assets credited to the Annuity Savings Fund on account of Rescue Squad Workers on June 30, 2012 amounted to \$3,043,832. The balance sheet also shows that the future contributions by members have a present value of \$2,303,196. The present value of both past and future contributions of members is therefore equal to \$5,347,028. The liabilities of this fund are also shown to be equal to \$5,347,028.

Pension Accumulation Fund

The Pension Accumulation Fund is the fund to which the contributions made by the State are credited and from which are paid all benefits on account of pensioners.

The current assets creditable to the Pension Accumulation Fund on account of Firemen on June 30, 2012 amounted to \$266,361,800. The liabilities on account of active members amounted to \$182,925,377. In addition, the balance sheet indicates liabilities of \$186,449,418 on account of all benefits payable to pensioners as of June 30, 2012. The total liabilities of the Pension Accumulation Fund for Firemen, therefore, amounted to \$369,374,795. The difference between these liabilities and the current assets credited to this Fund is \$103,012,995 which represents the present value of future contributions to be made by the State. Of this amount, \$38,760,406 represents the present value of prospective normal contributions by the State, and the balance of \$64,252,589 represents the present value of prospective accrued liability contributions.

The current assets creditable to the Pension Accumulation Fund on account of Rescue Squad Workers on June 30, 2012 amounted to \$33,929,092. The liabilities on account of active members amounted to \$17,877,545. In addition, the balance sheet indicates liabilities of \$19,893,990 on account of all benefits payable to pensioners as of June 30, 2012. The total liabilities of the Pension Accumulation Fund for Rescue Squad Workers, therefore, amounted to \$37,771,535. The difference between these liabilities and the current assets credited to this Fund is \$3,842,443 which represents the present value of future contributions to be made by the State. Of this amount, \$3,163,216 represents the present value of prospective normal contributions by the State, and the balance of \$679,227 represents the present value of prospective accrued liability contributions.

SECTION IV – ASSET ALLOCATION

The following table shows an allocation of investments by category for the Annuity Savings Fund and Pension Accumulation Fund as of June 30, 2012.

SECTION V - CONTRIBUTIONS PAYABLE BY THE STATE

The normal contribution covers the State's share of the cost of benefits based on current service. The valuation indicates that the annual normal contribution payable by the State is equal to \$151.15 multiplied by the number of active members. Based on 37,518 active members included in the valuation, the normal contribution for Firemen is \$5,670,846. Based on 3,352 active members included in the valuation, the normal contribution for Rescue Squad Workers is \$506,655. The valuation also indicated that the annual accrued liability contribution per active member is \$206.58.

The accrued liability is amortized over a period of years through an annual accrued liability contribution. Based on the amortization schedule for the unfunded actuarial accrued liability shown in Schedule B, the annual accrued liability contributions are \$8,350,083 for Firemen and \$92,778 for Rescue Squad Workers. The total contributions on this basis are \$14,020,929 for Firemen and \$599,433 for Rescue Squad Workers. The following table shows the annual contributions payable by the State.
